# What John Wanamaker Said

John Wanamaker started in business in a small store in Philadelphia in 1871. The first day he took in \$24.67. He spent the \$24 on advertising and left the 67 cents n the till. He continued to advertise. Other Philadelphia merchants said he was crasy. To-day the Wanamaker stores in New York and Philadelphia spend over a million dollars a year for newspaper advertising.

"Continuous advertising," said John Wanamaker "likecontinuous work, is most effective. If there is any enterprise in the world that a quitter should leave alone, it is advertising. Advertising does not jerk it pulls. It begins very gently at first, but the pull is steady. It increases day by day, year by year, until it exerts an irresistible power. To discontinue your advertisement is the same thing as taking down your sign. If you want to do business you must let the public know it. I would as soon think of doing business without clerks as without advertising.

Advertising is a herald of better things.

El Primary against For the past three months we have been using Earvelubs Oil exclusively in our fleet of sixteen cars.

In justice to you we are only too pleaged to inform you that, in the past we had trouble with cily spark plugs in several of our cars, but since using "Marverbbe" this trouble has been eliminated entirely.

Every one of our cars average 1,000 miles per week, and to keep them free from carbon it used to be necessary to have them in the repair shop at least once a month.

It has not been necessary for us to send a car to the repair shop on account of carbon nince we started to use this new oil.

We wish to offer you our congratulations. Yours very truly,

any motor of the such a test were carried out in a single pleasure car with such a remarkable record of satisfaction, it would be convincing proof of the quality of the oil used.

In the case of the National Taxl, Limited, Marvelube Motor Od produced the amazing jubricating results described—not in one ear but in sixteen hard-driven taxl cabs!

In these sixteen cars—12 Over-lands and 4 Nash models—the mechanical and operating con-ditions must necessarily have varied considerably, yet the re-sults were the same in all cases.

Marvelube Motor Oil is made in oir grades—Light Medium, Med-ium, Heavy, Special Heavy, Extra Heavy and "F" for Fords.

To secure maximum lubricating results from your car it is essential that you use the grade recommended for your make and model of car.

See the Marvelube Chart of Re-commendations for the correct grade for your car and always insist upon that grade whenever

There's Health on the Highways

Vitalizing air revives tired bodies and relieves iaded nerves

Perfume of pines—earthy odour of virgin rest—symphony of wind and waterfall.

When you're drowsy with business—when you need a few days off—try a motor trip or Ontario's highways. These magic trails lure people of town and city to lake, stream and woodland. They lead to enjoyment, hospitality and health.

Know the highways, for they are yours. You will learn of their usefulness and extent. You

will understand the intricacy and costliness of highway construction and repair.

These good roads belong to you and other motorists; it is you who will bear the cost of their maintenance. Use them sanely. Drive moderately for safety's sake and to avoid unnecessary destruction of road surfaces.

Reasonable speed limits are provided by law. You are urged to observe these limits. Fines are in store by law for those who do not.

MGLAUGHLIN-BUICK
EVER BUILT

McLAUGHLIN MOTOR CAR COMPANY, LIMITED

Branch House

2 BRIDGE ST. — BELLEVILLE

THERE is princely luxury and refinement apparent in every detail of the 1927 McLaughlin-Buick.

New Coronation Colors in Duco, the year's latest custom shades for exterior finishes; new and exclusive upholsterings and interiorware in the beautiful, new, closed bodies by Fisher; recessed windows with two-tope custom effects; jet black tires and jet black rims—feffects jet black tires and jet black rims—

These are but a few of many smart features which distinguish these remarkable new motor cars.

And McLaughin-Buick luxury costs much less than you must pay elsewhere for similar value. That is an advantage of enormous volume.

Come in today and see the Greatest McLaughlin-Buick Ever Built.

### THERE IS NO SATURATION POINT FOR HONEST VALUE

Build a product that the world needs, better than the world expects, and mounting sales will answer those who are constantly predicting a saturated market.

During the first six months of this year, for instance, Dodge Brothers (Canada) Limited, sold and delivered to customers 79% more motor cars and trucks, than for the same period during 1925. This gain over the first six months of the previous year advances Dodge Brothers (Canada) Limited to an enviable position in the Industry.

For the three weeks ending July 17th, 89% more motor cars and trucks were delivered to customers, than during the same period last year. This increase is impressive evidence that Dodge Brothers great sales gain is continuing through the quiet weeks of mid-summer.

There may be a saturation point for mediocrity, but honest value will always command a great and ever expanding market.

ions already possess so large a measure of national autonomy that it is not easy to see how they could be Mr. Bruce's emphatic protest again anything which threatens the integr ty of the empire is welcome; but I is to be hoped that he does not in tend to advocate the withrawal or surrender of any autonomous powers that the dominions have acquired Such a backward step it would be proper to resist. Particularly mus Canada insist upon her right to par ticipate actively or to remain passive in wars in which Britain may be en gaged as a belligerent, according to the will of the Canadian people as eral election or through their repre but few of theps would care to have this country subject to dictation by any central authority as to the char-acter or the amount of the contribu-

that empire sentiment is active and strong enough and widely enough dis tributed to check any tendency that may develop towards a status which would transform the relations of the liance of sovereign states, which is the idea of Hertzog and perhaps that of the Free State government also. That centiment sometimes makes it For example, a day or two ago it was very much in evidence at a meeting of the Labor party in South Afric of the Labor party in South Africa The meeting was addressed by the leader of the Labor party, Colone Cresswell, who is at present support ing the Hertrog government and ha approved of the government's pro posel of a national flag from which the Union Jack is excluded. ### The BATTLE starts when you step on the starter

THE minute your foot goes down on the starting button, war is declared; a relentless war between deadly heat and friction on one side and your motor oil on the other.

Your motor's performance, the length of its life, and the size of your engine repair bills, all depend directly on the outcome of that constant, bitter struggle,

No wonder car owners, in fast increasing thousands, are turning to Veedol, the motor oil that gives the fighting "film of protection" \_a film, thin as tissue, smooth as silk, tough as steel-a film that conquers deadly heat and friction, safeguards your motor, and keeps it cool, sweet-running and free from repairs.

### Stop today at the Veedol sign

Let the Vecdol "film of protection" hold the fighting line in your motor. Stop today at the orange and black Veedol sign \_\_it's the sign of a good dealer.

Have your crankcase drained and refilled with the correct Veedol oil for your car. Then the Veedol "film of protection," your motor's most steadfast defender, will be unfailingly on the job.

Be sure to ask for Veedol by name.

Veedol Motor Oil is made in 6 grades, veedol Note of the state of states in a state of states of states

### What John Wanamaker Said

John Wanamaker started n business in a small store in Philadelphia in 1871. The firs day he took in \$24.67. He spent |the \$24 on advertising and left the 67 cents n the till. He continued to advertise. Other Philadelphia merchants said he was crasy. To-day the Wanamaker stores in New York and Philadelphia spend over a million dollars a year for newspaper advertising.

"Continuous advertising," said John Wanamaker "like'continuous work, is most effective. If there is any enterprise in the world that a quitter should leave alone, it is advertising. Advertising does not jerk it pulls. It begins very gently at first, but the pull is steady. It increases day by day, year by year, until it exerts an irresistible power. To discontinue your advertisement is the same thing as taking down your sign. If you want to do business you must let the public know it. I would as soon think of doing business without clerks as without advertising.

Provincial Police Sergt. Clarke of this city, and Provincial Police Sergt. Clarke of this city, and Provincial did a good stroke, of business when they apprehended Frank Godfrey and Franklin Sarley of this city together with Leopold Martin and Harmesda Chartrand of Montreal.

The quartette were rounded up about 9 miles from Nap-ance after they had passed through this city. To the local po-lice is also due some credit for the arrest as they worked in conjunction with the Provincial Police in tracing the alleged culprits. Charges against the comparatively young men are numerous as they are wanted in Trenton, Oshawa and other places for alleged robberies and car stealing.

Whilst Martin and Chartrand claim that they have no knowledge as to any shady transactions by Godfrey and Saley, they are nevertheless held as suspects.

Their version of the affair is that they were only getting a ride with the other parties.

# for the first time an enginé-vibrationless beyond belief

McLaughlin-Buick now presents a new and finer motor car with an engine vibrationless beyond all previous experience!

At every point in its whole power range, this engine will remind you of the smoothness and quietness of electrical operation.

No other car today, regardless of its price, accomplishes the same freedom from noise and rumble. No other closed car interiors are so divorced from mechanical roar.

McLaughlin-Buick engineering has achieved the result that all motor car engineers have sought for years.

Come in and take out one of these new. 1927 McLaughlin-Buicks for your first ride in the Greatest McLaughlin-Buick Ever Built!

Warmed air properly humidi-fied in the furnace, uniformly dis-tributed to every room in the home, gives it that summer softness

which means comfort and health to all the inmates and that is just what the Sunshine Furnace is guar-anteed to do when installed by McClary's accredited dealer in your district. No More Fuel Worries The Sunshine Furnace eliminates the fuel worry, too. It burns hard coal, soft coal or coke equally well. All Cast Iron Construction well. All test from Construction gives it the stardiness to stand up under the concentrated heat of coke, and the patented Exclusive Air Blast Ring by a simple operation of the drafts enables it to hum soft coal as well as hard coal.

Write your nearest McClary's Branch for free booklet: "Winter Comfort in Canadian Homes," that will give you much interesting information about nearing, fuel, and the proper installation of furnaces so necessary in solving the problem at coeffort in Winter.

# 8 definite FORD economies.

# for the man who operates a FORD car or truck

HUNDREDS of thousands of Ford owners or operate Ford trucks for pleasure or business or operate Ford trucks for business now secure these 8 definite operating economies;

10, to 25% gasoline saving
Eliminates couly chatter
10 to 25% saving in oil
Locressed shilty to coast
Radoen sepair bills

These remarkable economies are made possible only by an oil created especially to meet the peculiar requirements of the Ford system of lubrica-

Why your Ford requires this different kind of oil

In all other cars than the Ford, the motor and the transmission are separately housed and separate by lubricated; the motor by a motor oil designed for that purpose; the transmission by a lubricant designed for that purpose.

But in the Ford, the motor and the transmission are combined in one housing. Both must be lubricated by one oil—the same oil. That is why it is necessary to use only an oil made exclusively for Fords.

Veedol Forzol was created for Fords after four years of laboratory experiments and road tests. Thousands of Ford owners have found that it gives them 8 definite operating economies.

Go to your dealer today and have him tell you about Veedol Forzol. He has complete stocks in convenient containers—from a sealed gallon can to a 50 gallon drum. Drive in today and see him.

Veedol Forzol is one of six grades of Veedol. Whatever car you drive your Veedol dealer can supply you with the correct grade for your motor. CROWN OIL COMPANY, LIMITED

of Service to From a pinch of living insignificance springs Canada and that exultant shout of glory which men call Canadians a maple tree. From the brain of Robert McLaughlin, a farm lad

whittling axe helves for his neighbors, sprang Canada's greatest automotive industry, General Motors of Canada.

A Canadian institution, founded by a Canadian, staffed by Canadians, employing Canadian workmen and using Canadian materials, General Motors of Canada has been for sixty years a paramount factor in the Dominion's prosperity and progress.

It sells to Canadians through Canadian dealers and, in addition, distributes Canadian-built cars wherever the flagof Britain flies.

It uses lumber from Canadian forests and steel made in Canadian mills from Canadian ore, smelted by Canadian GENERAL MOTORS of CANADA,

foundrymen. It purchases from Canadian sources vast quantities of brass and copper, of wire and glass, of nickel and fabrics, oils, paints and Duco finishes-

and all that heterogeneous mass of materials which enter into the making of a modern automobile-and which have entered into the building of a total of more than 325,000 General Motors of Canada cars and trucks.

Building cars to suit every purse and purpose, to meet every need and condition of Canadian life and travel, General Motors of Canada is one of the great institutions that is acquiring for Canada a higher and yet higher place at the world's council table.

Now at the height of its sixty years of service to the Dominion, it is helping to make Canada an even greater Canada for Canadians.

Dodge Brothers have kept the faith. Year after year their motor car has con-tinued to mature into a better and better product

Beauty has been added to dependability, comfort and silence to beauty. Endless refinements have been made, and the basic sources of Dodge Brothers quality maintained in every detail.

As a consequence, the NAME Dodge Brothers is even more valuable than the great Dodge Brothers plant itself, and eminently worthy of the public confi-dence it everywhere inspires.

The public may rest assured that a Good Name so priceless will be safe-guarded jealously by those who hold its destinies in their hands.

In the New Rapid Element

# SPEEDIRO

AT last |-- after years of ex-periment and research a perfect rapid iron cooking element has been developed. An element which brings speed, lasting durability and absolute safety to electric cooking-McClary's Speediron

This wonderful, rapid element is as far ahead of all others as electric light is ahead of candle light.

McClary's Speediron is the only protected, removable, repairable element made. It operates on contact heat. This gives it marvel-lous speed and eliminates waste by radiation which is one of the greatest defects of open elements. And the Speediron is durable. It cannot be injured by liquids boiling over, pans. The cast iron surface protects the coils year in and year out—and if the coils by any chance burn out you can have them replaced easily, inexpensively and quickly—while you wait. The element proper lasts as long as the range itself

### Speediron Elements Now on all McClary's Electric Ranges

This great, new electric feature is now on all McClary's Electric Ranges—making it the most efficient, satisfactory range on the market. And you also get the exclusive udvantages of McClary's famous porcelain enamel-

ed "fireless cooker" oven -the oven which keeps on cooking even after the current is turned off. The heavily-insulated oven walls retain heat indefinitely-giving splendid baking results and insuring great economy.

Ask your dealer about a McClary's Electric Range. After you've seen him demonstrate the Speediron you'll agree that McClary's is far ahead of any other for, economy, speed, strength and general satisfaction.

# -The Constitutional Crisi

The constitutional issue is pure political buncombe, designed to divert attention from the King Government's administration of the Customs Department, upon which issue it was ignominiously defeated in the House of Commons.

### Here are the oftal stubborn facts:

- 1 In September 1925, Mr. King was granted dissolution by His Excellency Lord Byng, on the representation that he must be given a chance to secure a clear working majority. He stated at Richmond Hill that if such a majority was not forthcoming he would not attempt to carry on-
- 2 In the old Parliament thus dissolved there had been 234 mmbers, of whom 117 were Liberals, 66 were Progressives or Independents and 51 were Conservatives.
- 3 In the new Parliament, elected in October, 1925, Mr. Meighen had by far the largest group—almost half the total membership of the House. Out of 245 seats the Conservatives had 116, the Liberals 101, the Progressives 24, Labour 2, and Independents 2.
- 4 Instead of immediately resigning, as he should have done in view of the ground upon which he had been granted dissolution, Mr. King asked for and was granted leave to carry on, on the assurance that he would leave the fate of his administration to Parliament itself.
- 5 On Friday, June 25th, three separate motions by so-called Independents, insupport of which Mr. King's Government marshalled its last ounce of strength, were decisely defeated and the original motion of censure, to which the foregoing

- had been moved in amendment, was still awaiting decision in Parliament when Mr. King asked His Excellency for dissolution on Monday, June 28th.
- 6 To have granted Mr. King a dissolution under such circumstances would have been a direct denial of the right of Parliament to pass upon the vote of censure then pending.
- 7 Following Mr. King's resignation, Parliament by a majority of 10 did actually adopt a direct vote of censure on the King Government, and declared it unworthy of confidence or
- 8 It was Mr. King's refusal to follow British precedent in cooperating with the incoming administration to pass supplies and complete the sessional programme that left Mr. Meighen no alternative but to ask for dissolution.
- 9 Mr. Meighen followed the same course as that adopted by Sir Wilfred Laurier in 1911, when he saw that it was impossible to carry on and abruptly dissolved Uarliament.
- 10 If His Excellency had recalled Mr. King to office, he would have done so in the very face of Parliament's vote of censure-
- 11 Under Mr. King's interpretation of the constitution a Premier need never resign, but could demand dissolution after dissolution, despite the verdict of Parliament or the electorate, and the Governor General must perforce accept his advice.

This is the story. It calls for no comment - it speaks for itself!

The Conservative Party stands solid as a rock for sound British constitutional practice, the maintenance of the British connection, and the right of Canada to enjoy the blessings of stable Government.

# The Customs Scandal

With the customs investigation still far from finished, the King Government already stands convicted of having co-operated with smugglers, bootleggers. dopesters and thieves, and of having thus been a party to defrauding the National Treasury, strangling legitimate business, debauching officials, high and low, thwarting the administration of justice, and bribing the electorate!

#### To cite but a few instances--already proven-from its appalling record of malfeasance:

- Stolen automobiles, smuggled into Canada with the connivance of Customs officials, were told for a pittance to friends of the King Government, and those found guilty were allowed not only to go unpunished, but to continue their nelarious trade.
- 2 Smuggled liquor selling was engaged in on a large scale by Customs officials whose duty it was to protect the Treasury.
- 3 Corrupt officials were unpunished and promoted; honest officials were punished and demoted.
- 4 Prison-made goods are on the prohibited list, yet tens and tons of such goods, produced in prisons where contagious diseases were prevalent autong the inmates, were smuggled into Canada for sale to innocent Canadian consumers, with the direct knowledge and co-operation of Government officials.
- 5 Police officers—members of the incorruptible Royal Canadian Mounted—were withdrawn from the Quesee boundary line at the request of the smuggling ing. Honest traders had asked for increased police protection, but the King Government preferred to grant the request of those who were defrauding the public revenue.
- 6 Guilty knowledge even in 1923 of the frauds that were being practised has been proven against the King Government beyond the shadow of a doubt. Time and again, in 1924 and 1925, the Commercial Protective Association—an organization of business men—placed bottom Mr. King irrefutable evidences of it, that they had succeeded in trating down at their own expense. With his Government thoplessly cleanized with Canuda's orthinal belement for King of a cleaning of which are the control of the contro

- 7 A total revenue loss estimated at \$35,000,000 per year was the result of the smuggling thus condoned by the King Govern-
- 8 A \$5,900 loss was statistical in one case alone when Mr. Cardin, Acting Minister of Castons and Eories, settled for \$3,200 with a distonent Importer, who, eccording to Mr. Cardin's own officials, had cheated the Tressury out of duties amounting to \$58,000. This deal was consummated just previous to the last election.
- 9 Free liquor, from Government warehouses in Montreal, was supplied in generous quantities to members of thei King Gov-ernment and to Government officials in Ottawa, in contra-vention both of the Federal Law and the Prohibition Law of
- 10 The habit-forming drug traffic is one of the worst curses in the world today. Under the protection of the King Govern-ment, Montreal became one of the great dope-distributing centres of North America.
- 11 The peak of this corruption, and of this interference with the Customs cellection and the administration of justice-by-prome by the evidence to have been réached just prior to the general election of Cotober, 1925, when, at the written request of Liberal candidates, Ministers of the Crown called off the Royal Canadian Mounted Fulice because they were entorque Treasury frauds as a means of securing the return of the King Government to power.

Despite the fact that with Mr. Kennedy supporting them, the Liberals had a majority on the Investigation Committee, that the Chairman Mr. Mercier was a Liberal, and that the Prosecuting Counsel Mr. Calder was a Liberal candidate in the last election, and despite the further fact that the committee sat almost daily for five months, thus affording Liberal members ample opportunity to uncover malfeasance on the part of previous ministries, not one word of proof, not one breath of suspicion, was brought against the administration of the Customs Department under the Laurier, Borden and Meighen Governments, but only against its administration under Mr. William Lyon MacKenzie King!

Has anything more disgraceful ever besmirched the pages of Canadian history? Can a proud and honourable nation, whose people fear God and eschew eyil, afford to condone such dishonesty, such corruption, on the part of its leaders and public servants?

FOR W. E. TUMMON IN HASTINGS S. FOR A. T. EMBURY IN HASTINGS-PETERBORO. FOR JOHN HUBBS IN PRINCE EDWARD-LENNOX. FOR M. E., MAYBEE IN NORTHUMBERLAND.

And avoid another Election!

# Canada Flooded With Infected Prison-Made Garments

#### King Government Permit Canadian Men, Women and Children to be Endangered from Infected Garments from U. S. Prisons

Perhaps the most detestable class of smuggling which was brought before the Committee was that of the smuggling into Canada of clothing of various kinds which had been made in the prisons of the United States. The entry of prison-made goods into Canada from the United States is "absolutely prohibited by law, even on the payment of duy.

The United States will not tolerate, within its own bortlers, the sale of goods made in its own prisons—it knows they are likely to carry contagion.

Many complaints had been made to the Government in reference to this traffic; and as early as August, 1924, a large deputation of business men had put the whole matter of the smuggling of prison-made goods into Canada before R ght Hon. W. L. Mackenzie King and members of his Cabinet. Nothing, however, was done by the Governigent, by ...

On November 18th, 1924, the matter was taken up directly with the Minister of Castoms. A complete list of priscn contractors in the United States was forwarded together with a great deal of information about this traffic, and the Minister was strongly urged to investigate the matter, but again no action resulted.

Giving evidence before the Committee, R. P. Sparks showed that the country was flooded with these goods, which were being sold openly with the prison labels on them, and he produced a prison made man's work shirt with the prison label on it, being sold openly in Ottawa.

Dugald Donaghy, M.P.; Liberal Member of the Committee, and the Minister of Customs and Excise, unsuccess uly endeavored in every possible way to discredit Sparks' evidence and protect the American prison contractors.

The firms handling these goods in Canada were practically all active Liberal politicians. One of them, Bissonette, was described by the Minister of Customs in a speech in the House of Commons "is a levery good fellow, an indimate friend of mine and a young gentleman whom i, have met on several occasions, both politically, and socialish."

In reference to another one, Jenkins, the King of the Rock Island smugglers and the largest distributor of prison-made goods. A. F. Holmes, Customs Officer at Rock Island, testified as follows: "I only talked with him (Jenkins) dew minutes: family he belieded out in pretty bold language and said he was a

strong Liberal, and if I cared about my job, I wanted to let him alone, and he said he could have any of us dismissed if he saw fit."

W. N. Baldwin, M.P. for Stanstead, Quebec, was the friend and intimate of smugglers, as was shown by the fact that in the case of a seizure from lenkins, the king of the Rock Island smugglers, Baldwin put up his own cheque for \$2,500.00 as part of a penalty imposed on Jenkins for smuggling.

To show the shocking conduct of the King Government in allowing its political friends to flood the country with this filthy product of American convicts, the following extract from a report made by a Joint Committee of Prison Labour of the Uniton-made Garment Manufacturers' Association of America and the United Garment Workers of America, one of the samest Labour unitons in the United States, is calightening. This extract was given in evidence before the Committee:

"Of far greater moment than the financial injustices involved is the matter "of public health. Prisoners are so largely recruited from the lower strata off society that they are almost universally the victims of the communioffice of the community of the commu

With a complete knowledge of the facts, the King Government continued to permit the smugglers to defraud the revenue, corrupt our officials and en-danger the health of our innocent children.

The tragic part of this traffic is that a large percentage of these goods were children's cotton play suits, overalls, etc., which Canadian children wear next to their skin. It was proved that thousands of these disease-carrying garments were smuggled into Canada.

Every man and woman in Canada should rally to the polls to defeat the men who allowed this condition to exist, particularly in view of the fact that it has been proven beyond dispute that the Right Hon. W. L. Mackenzie King, the Hon. Jacques Bureau, and other members of his Cabinet knew for two years that this traffic was being carried on and never raised a finger to prevent it.

B asspices, the annual Belleville Exhibition may be classed as a lusty infant if you so cleare. It has most brillant propects. Its guardians in the shape of the Fair Board and their assistants are people who have its best interests at heart; they are learned in all that makes for success; they have come, some of them, through days with the old fair—which died—which meant rather bitter experiences.

THESE things are now forgotten and deserve to be forgotten in the light of the present undertaking. There is nothing in the process of the property of the pro

T will grounds are the pride of the city and year by year they spots in the district. The exhibits from farm and field, shop and factory and store are all-embracing. It is beginning to mean a yearly pilgringage for all the people of the surrounding country and Belleville Fair is now the great meeting place of the Bay of Quitne district.

HERE are attractions for all sorts and conditions of people. Whether you are from the city or the village or the countryside you will be greatly stimulated and enterbined. This year's fair will make you proud to be a citizen of the district. Four days of pleasure and profit. See that one entire day of your time if not more is given to The Belleville Fair.

# PRICE DICTATES NO POLICY TO OLDSMOBILE

IF Oldsmobile Six sold at twice its present price, Oldsmobile engineers could be no more careful or paintaking in its construction. In the matter of experiment, research and testing the best of all General Motors' resources was at the disposal of Oldsmobile—and freely used.

Just as carefully bulli—just as thoughtfully designed as the most expensive cars—Oldsmobile Six gives you a unique combination of big-car smoothness and power with small-car case and convenience. Alone among cars in its price range, Oldsmobile Six is precision-built throughout, every motor subjected to a dynamometer test, every engine part passing exhaustive inspection.

In the designing and building of the Oldsmobile Six, price is not the guiding factor. It is only the enormous purchasing power of General Motors and the large production schedule of Oldsmobile that make possible the amazingly low-prices at which this new and better Oldsmobile is now selling.

# A SIMPLE RECO OF FACT

# OF INTEREST TO THE MOTORISTS OF CANADA

N February 15th—just six months ago—we raised the curtain on a merchandising success, that has no counterpart in the snaals of modern business. It was then that we revealed the record of our four-year search for the ideal motor lubricant, and announced the culmination of that search in the development of a new and wonderful refining process. At once the attention of the motoring world was focussed upon Marvelube Motor Oil, by reason of the positive assurances we gave to trade and public that it would prove a revelation in lubricating efficiency.

On April 20th, Maryelube went on sale across Canada. On that very day it became apparent that our high claims had awakened-the interest of car owners to an extent never achieved for any other oil product. That first day our Denlers and Service Stations set new records in crankcase fillings for customers anxious to get the lubrication. benefits which we had told them Marvelube would ensure.

By May 1st, Marvelube sales had attained such proportions as to reveal a most gratifying readiness on the part of the Motoring Public to accept our claims at their full face value. From every one of our twelve Sales Divisions came reports of a demand so vastly in excess of our most optimistic anticipations as to constitute evidence of a public confidence seldom vouchsafed to any commercial institution.

By June 1st - to meet this unforeseen demand - we had doubled our plant capacity.

And yet today, in spite of intensive efforts to place adequate stocks at all our Sales Outlets, we still occasionally hear from Dealers and Service Stations that they have had to report themselves "temporarily sold out on certain grades"—and this in spite of the fact that we have been producing. Marvelube at a rate sufficient to fill a demand far in excess of our total Motor Oil sales for 1925.

The proved effect of Marvelube—in smoothness and economy of car operation—has 'so amply justified all the claims we made at the time of its introduction, that today we find the great body of the claim of the claim

Accepted at first "on faith" by motorists who realized we would not jeopardize our reputation by the slightest exaggeration of the actual facts, Marvelube is to-day dominating the oil trade of Canada by reason of actual results achieved in daily use in at least three hundred thousand crank-cases. There is no longer need for claim making. Marvelube now has a record of claim proving whereby even the ultra-sceptical must be convinced.

To complete the record of Marvelube's dramatic success, we now have on file official endorsements of this great oil discovery by the manufacturers of seventy-nine per cent. of the motor cars used in Canada. Marvelube, having been subjected by them to searching tests, has received unqualified endorsement as a Motor Oil of low carbon-content, low-cold test, infinitesimal sulphur content, unique resisting to the content of the motor of the motor

In thanking the manufacturers of motor cars who have so frankly endorsed Marvelube, and in expressing our appreciation to the public for their prompt acceptance of the new oil, we reiterate, for the benefit of those who have not yet tried it, the unqualified statement that Marvelube is different from and superior to any other lubricant that has heretofore been offered to the motoring public.

By securing the exclusive use of Peru-vian Crude, we placed ourselves in possession of the most valuable raw material for the making of lubricating oil that has ever been wrested from the oil fields of the world.

By discovering and perfecting the Marvelube process of refining, we so enhanced the inherent properties of that great crude as to be able to offer an oil possessing new and distinct properties and revealing a superiority to any other lubricant hitherto produced.

There is only one Marvelube, and the benefit of its use can easily be proved to any motorist's satisfaction by filling his crank-case with the correct grade and observing the result.

ST: CHARLES MOTOR COMPANY

ASK FOR VEEDOL AT WALKER GRILLS NEW ADDRESS-W. MGIRA AND MURNEY STS.  TO THE ELECTORS OF ONTARIO:

During the last three weeks I have declared the Conservative policy on fifty platforms in the four great Western Provinces, and I am today returning to Ontario assured of a gratifying gain in the West amply sufficient to make certain a strong and stable Conservative Government.

While absent from Ontario I have been advised that ex-members and supporters of the late King Government have abandoned discussion of the great issues involved and are confining their efforts to misrepresentation of minor issues, and with poison pen and whispered falsehood seeking to fan local prejudice and inflame racial differences, and thus divert public opinion from the late Government's deplorable record of departmental corruption, Parliamentary, barter, unstable tariff and hopeless misgovernment.

I am in this fight as Premier the country and as Leader of the Conservative Party, and I have no word of apology to make for one single word I have uttered during the campaign. I appeal on the Issues, and on them alone, to every Canadian, Protestant and Catholic, English, French, European, Jew and Gentile alike. We are all fellow-countrymen, with equal rights, common ends and an indivisible future. What is good for one is good for all.

Furthermore, it would appear that special appeals are being made to certain classes in the community, as, for instance, the canwass of the employees of the National Railway upon the misstatement that I am harboring some sinister design on the life of that Railway System.

The Railway policy of the Conservative Party is:

First, to courageously develop the National Railway System, preserving its complete integrity;

Second, to avoid political interference while maintaining the rights of Parliament:

Third, to give a loyal and consistent support to the President and management of the undertaking in the due discharge of their duties, and in making a success of the operation; and

Fourth, to bring to this country under the Conservative National policy of reasonable protection such a period of prosperity as will solve all our railway problems and bring to the railway workers an era of full-time employment with full rates of pay.

It is the solemn duty of all Canadians at this critical hour to forget differences of racial origin, of religious persuasion or of class interest, and to concentrate, work and vote for five prosperous years of stable government.

On October 29th last the Province of Ontario gave the Conservative Party, under my Leadership, the greatest majority of seats and of electoral votes wer accorded to any of party of seats and of electoral for such a further such a further to the conservation, and lapped confidently for such a further such a gain on September 14th as will ensure honest administration, a stable Government and such prosperity as this country has never harefore enjoyed.

them for their support!
During the past session of the House of Commons he employed the same tactics, and agein used those farmer members to the limit, just to keep himself in power. And ow, during the present campaign is using all his skill and dexter ity to ensure there being no Liberal opposition to those farmer candi-dates who will pledge themselves to support him. - In this way he hopes to make Liberals out of them and thus complete the annihilation of the farmaneparty.

On the other hand the Conserva-

tives have always opposed the en-trance of a third party in Parliament. The farmers of Canada were sever left is ignorance as to where the Conservatives stood. At the time those same Conservatives done more for th farmer then have the Tiberals. And now of co-operation marketing which is the one thing above all others that the farmers of Canada most need

marketing of farm produce, but to assist it and keep the actual work-ing of the system in the farmers where it belongs. The set azistance in the organizations of pools for marketing the different commodities; training and main-taining a staff of inspectors to en-force the standards agreed upon, tance in the organizations of providing warehouses for the store of farm produce so that it can fed to the market in proportion the demand instead of being to the demand, instead of being dumped as at present,—all these are things which could very pro-perly be assisted by the Govern-mest, and which will be so axisted if the Convervative Government

The farmers of Canada have been encouraged and assisted in the production end of their indus-try, but of what use is this if they lack the facilities for the ordinar marketing of their produce? Now they have an offer of real assist-ance, and it is to their interest to that the offer is not rejected.

LOWER FREIGHT RATES
HELP UNITE CANADA
The railways have been one of
the largest factors—if not the the largest factors—if not the largest—in cementing the provinces of Canada into one grand country, and in opening up that country for development. The building of them cost hundreds of millions of dollars. Rates were kept as low as possible, and produce of all kinds transported with the minimu individual in Canada

Then suddenly the rates were ot upward, as a war measure and against the good judgment of Sir Henry Drayton, at present Acting Prime Minister of Canada. With blic sentiment strongly averse to

TIES An International Proving Ground to Safeguard Quality & Value Every make of car being built by General no matter by what cars, are all at the dis posal of the staff of General Motors of Motors is subjected to nitiless tests on the

General Motors Proving Ground.

Unhill and down, in full flight on the straightaways or creeping along on "high", over rough and rutted roads, through blistering heat and bitter cold, in mud and slush and rain and snow... under every conceivable condition of actual use ... every General Motors car must eternally prove its worth.

Its 1,125 acres patterned with roads of dirt and macadam and concrete, this great International Proving Ground in the heart of the automotive industry is the first and finest proving ground in all the world.

Here research, trials, tests and re-tests are conducted under supervision of an engineer-ing staff unequaled elsewhere in the automotive world. The facts and findings disclosed,

Canada, Limited at Crowned with hills of various lengths and

grades, this proving ground indeed does prove "what stuff a car is made of."

Duplicating all driving conditions, it duplicates owner experience...in advance.

And every General Motors car must pass its relentless tests... with flying colors.

General Motors cars have met and surmounted those terrific tests... have accepted and fulfilled those merciless demands Cadillac, McLaughlin-Buick, Oakland, Oldsmobile, Pontiac, Chevrolet ... every one!

Each owns the certification ... "Proved on the Proving Grounds"... conclusive assur-ance of quality and value!
